

Upon reading the information regarding the National Association of Broadcasters petition 04-160 I was appalled. Once again we have a small group of people attempting to dictate what millions listen to on a daily basis. The NAB's main concern, and it's members, is that of the dollar not what people want for programming. XM radio is a breath of fresh air in the very stagnate world of commercial radio. I respectfully urge the FCC to reject petition 04-160 and in doing so let that send a message to the NAB and its members that maybe they are out of touch with their listeners.
